

Congress of the United States
Washington, DC 20515

January 16, 2025

Dear President-elect Trump,

Congratulations on your decisive victory in the recent presidential election. We believe your win reflects a clear mandate from the American people that they are exhausted by the unconstitutional and radical diversity, equity, and inclusion (DEI) ideology and are ready for an administration that finally puts America and *all* Americans first.

As the members of the 119th Congress' Anti-Woke Caucus, we are writing to encourage you to rescind all executive orders put forth by the Biden-Harris Administration that advance a DEI-related agenda, namely Executive Orders 13985 and 14035, both of which were designed to force DEI policies into every branch of the federal government, while funding them using billions of taxpayers' hard-earned dollars. We also urge you to abolish all DEI departments and programs within the federal government and immediately terminate all employees associated with them.

Acknowledging that your incoming administration is likely already on the way to doing just as we have respectfully suggested, we also want you to be aware that the Anti-Woke Caucus is prepared to stand with you to accomplish your agenda and that you have our full support in dismantling Biden and Harris's DEI legacy in the federal government and beyond. We look forward to working with your administration, including the incoming Department of Government Efficiency, to advance a constitutionally based pro-liberty and pro-freedom agenda for all Americans—one that rejects and roots out those unconstitutional DEI policies that run rampant throughout the federal government and that are designed to divide rather than unite us.

Sincerely,

Harriet M. Hageman
