Introducing: The COAL Act

The Biden Administration's war on reliable energy continues to unfairly target Wyoming's coal industry, and America is paying the (rising) bill.

On Wednesday I introduced **H.R. 1457**, the Combating Obstruction Against Leasing Act, or "COAL Act" to the House of Representatives. This bill will end the current moratorium blocking new coal leases and requires the Department of the Interior to resume processing of applications pending review. Wind and solar cannot satisfy all our energy needs in the West; investing in coal will keep the lights on.

This bill has been included as part of the TAPP American Resources Act, which I voted to advance from the House Natural Resources Committee to a vote of the full House of Representatives. You can [read my full statement here](#).
